

PowerBoss®
The Power of Clean

Collector 35
Walk-Behind Sweeper

The Collector 35 walk-behind sweeper is compact, easy to maneuver and dependable. This sweeper is designed for years of reliable, long-lasting service. The highly maneuverable walk-behind sweeps up to 45,000 sq. ft. per/hr. It easily climbs grades of 20 percent. This heavy-duty sweeper is chain-driven through the rear with an automotive-type differential allowing power forward and manual reverse. Anti-shock structure minimizes vibration from engine and terrain. A retractable side brush sweeps dust out from corners and from under edges. Dust is controlled by its unique vacuum-effect and 43 sq. ft. dust filters. Dirt is swept into the path of the wide main broom which sweeps it into the Collector 35's 2.5 cu. ft. hopper.

Easy access to service: The cover simply lifts up for easy access to filters, batteries, brakes, main motor, side broom and main broom.

Easy to empty hopper: The large capacity hopper means less emptying. It easy to empty by way of the pull out handle.

Side brush: The side brush throws debris into the path of the main broom. It is excellent along curbs, skids and racks.

BLUE PowerBoss is proud to be BLUE!
What does it mean to be BLUE?

Specifications

Sweep Path	34" (86cm) Up to 45,000 sq. ft. per hour
Main Broom	28" Width (71cm) ,Chevron bristle pattern
Side Broom	16" diameter (40cm). Retractable 5 cartridge filters 43 sq. ft. dust filter surface
Filters	Wet-Sweep bypass, Automatic Filter Shaker
Hopper	2.5 cu.ft.
Engines	5 HP gas engine or 12 -volt battery system
Construction	Extra-strong, anti-shock metal structure, Coated with rustproof epoxy Shock-absorbing hood and bumper
Brakes	Service & Parking brakes standard
L x W x H	56" x 34" x 37" (142.25cm x 86.36cm x 94cm)

- **Water Conservation** – Aqua-Stop saves water usage by 50%, water is released through a pump system providing greater control of water usage than gravity systems
- **Clean Air** - High-performance filter system dramatically reduces the release of dust and debris back into the air, dust vacuum ensures that dust is put directly into the hopper, bristle pattern on main broom increases dust control
- **Lower Emissions** – All gas and LP engines meet Tier 2 specifications, catalyst mufflers, battery operated available, diesel operated available, bio-diesel fuel can be used in Kubota engine
- **Safer Work Environment** – Orange machines are highly visible to others in the workplace, simple controls reduce operator error, one-button scrub, horn, fire in hopper indicator, effective braking system, "belly bar" prevents operator from being pinned behind machine when in reverse, parabolic squeegee picks up all water leaving the scrub path virtually dry for traffic, seat equipped with safety shut-off switch, also available: overhead guard, back-up alarm, warning beacon
- **Clean Energy** – Battery operated available, bio-diesel fuel can be used in Kubota engines
- **Lower Chemical Reliance** – Aqua-Stop saves chemical usage by 50%, pump system for water and chemical release allows for better control of chemical usage, chemical metering system is available as an option and regulates chemical usage to the correct dose

Features listed are general for PowerBoss equipment; each machine has different features and therefore, may or may not fill all of the features listed above.
